UX/Product Designer with a track record of turning unfamiliar domains into research-backed, production-ready design systems under tight timelines.

EDUCATION

Savannah College of Art and Design (SCAD)

Sept 2023 – Nov 2026

- M.F.A. in Interactive Design and Game Development (ITGM)

Xiamen University

Sept 2019 – Jun 2023

- B.A. in Digital Media Art

EXPERIENCE

Mayo Clinic × SCADpro

Jan 2026 – May 2026

Branding Lead & Interaction Designer, 20-person cross-functional team

- Built brand identity, visual system, and interaction design in Figma for a mixed reality BLS training simulation, implemented in Unity for clinical staff
- Conducted 2 rounds of usability testing with **20 clinical staff on-site**, receiving consistently positive feedback on interface clarity and ease of use; iterated on IA, visual hierarchy, and interaction patterns
- Owned all **5 client presentations** over 10 weeks, managing scope from discovery through final handoff; final presentation received positive feedback from physicians on design clarity

Universal × SCADpro

Sept 2024 – Nov 2024

UI/UX Lead, 20-person cross-functional team

- Built concept direction, UX, and app design in Figma for an AR installation immersing Universal Studios guests in an after-party experience: brand analysis, **5 concept proposals**, wireframes to final hi-fi prototype
- Designed complete feature set including personality-based onboarding, navigation, and interactive modules, building a brand-aligned visual system with consistent typography, color, and component structure across all screens
- Presented final prototype at an on-site exhibition recreating the actual event environment; client praised the design's fidelity to their vision and retained the physical model for internal reference

Massie Heritage Center × SCADserve

Sept 2025 – Nov 2025

UX Researcher & Experience Designer

- Conducted primary research (**16 surveys**, 4 interviewee groups) at a historic preservation museum, identifying ADA compliance, wayfinding, and multicultural narrative as primary pain points
- Developed a three-tier proposal (Basic / Advanced / Premium) with scoped hardware specs and itemized budgets per tier, enabling client to select based on funding capacity
- As Visual Design Co-Lead, built exhibition visual system and tablet UI wireframes in Figma; client praised the design's comprehensiveness and visual execution, selecting **the Premium Package (\$81,200 to \$133,500)** at mid-project review

TECHNICAL & SKILLS

UX & Product Design: User flows, wireframing, hi-fi prototyping, mockups, production assets, annotations
Typography, layout, color theory, iconography, composition, accessibility-informed design
Component libraries, design tokens, style guide documentation, content hierarchy, component-based design thinking

Research & Collaboration: User interviews, usability testing, journey mapping, affinity mapping, qualitative data synthesis, research methodologies; data and user insights to inform design decisions
Cross-functional collaboration with engineers, product managers

Tools: Figma (Auto Layout, Components, Dev Mode, Prototyping), Adobe Illustrator, Photoshop, After Effects, HTML/CSS; AI-assisted workflows, Cursor, GitHub, Vercel
